HOW TO HOST A FABRIC MINECRAFT SERVER

STEPS:

1 **Download and Install Java**
A programming language that is required to run Minecraft and Fabric.

2 **Download and Install Fabric Server**
This software allows you to run a Fabric Minecraft server.

3 **Download and Install Fabric Mods**
They add new features, content, or functionality to your Minecraft game.

4 **Configure and Launch Fabric Server**
Edit files and folders in your Fabric Server directory

5 **Connect and Play Fabric Minecraft**
A game that you can play on your Fabric Server with your Fabric Mods.

6 You are all set
