

What is the Cheapest Minecraft Server Host?

Setting up your Minecraft server for exploration, building, and survival with friends.

Considerations for a Budget-Friendly Host:

- RAM allocation
- Location
- Number of players
- Additional features (e.g., backups, mod support)

Budget-Friendly Options

- Apex Hosting
- Scalacube
- Shockbyte
- The Minecraft Hosting
- PebbleHost

Comparison Table

Provider	RAM	Players	Price
Shockbyte	1 GB	No Limit	\$2.50/month
The Minecraft Hosting	512 MB	10	\$1/month
Apex Hosting	1 GB	12	\$4.49/month
PebbleHost	1 GB	No Limit	\$1/month
Scalacube	768 MB	10	\$2.50/month

Prioritizing Performance

Cheapest doesn't always mean best.

Consider

- world size
- number of players
- mods/plugin usage for optimal performance.

Potential Problems with Cheap Servers

- **Lag**
Slow or delayed gameplay due to low server resources.
- **Limited Players**
Maximum players depend on server RAM and provider rules.

Conclusion

Choosing an affordable host involves considering RAM, server location, and player capacity for a smooth gaming experience.
