

Set Up Your Firewall

6

Allow the necessary ports through your firewall. Commonly used ports include:

- Outgoing UDP: 27900, 29910, 29960
- Outgoing TCP: 80
- Incoming UDP: 16567 (game port), 29900 (gameSpy port)

7

Port Forwarding

If you're using a router at home, you'll need to set up port forwarding to your server's IP address in your LAN for the above ports.

Remember, this is a very basic guide. For detailed instructions, you should refer to the full setup guide that comes with the server files. Good luck with your BF2 server hosting!
